Portfolio

PROJECTS

MCP Forge – Spec-to-MCP-Server Generator

Developer Platform

- Built a platform that turns an OpenAPI spec or an installed Python library into a complete, installable MCP server through deterministic, audited code generation – no LLM calls in the core pipeline.
- Built a playground that spawns the generated server as a real subprocess and drives it over the live MCP protocol, so what gets tested is exactly what ships, not a simulation.

TaskForce – Multi-Agent Workflow Platform

Multi-Agent Systems

- Built a platform for orchestrating teams of AI agents through multi-step business workflows, with per-agent model routing (local or hosted) and live streaming execution.
- Designed a concurrency-safe orchestration engine for sequential, parallel, and conditional agent execution, with per-run cost caps and automatic crash recovery.

Lumio – RAG Chatbot Platform

RAG Platform

- Built a multi-tenant SaaS for RAG-powered chatbots, with per-tenant vector-database isolation and three interchangeable LLM backends, including a fully offline mode.
- Replaced a synchronous document-ingestion path with a fast-fail check and inline fallback, cutting upload latency from 60–90s to about 5s when no background worker is running.

EXPERIENCE

AI Engineer

Acadally

Jun 2024 – Dec 2025

Delhi, India

- Adaptive Tutoring System:** Spearheaded the development of an AI-powered tutoring platform for grades 5–8, personalizing learning experiences and improving engagement.
- Difficulty Calibration Agent:** Engineered an agent using Item Response Theory (IRT) to accurately calibrate question difficulty, integrating NCERT textbooks as retrieval-augmented generation (RAG) sources.
- Context-Aware Question Generator:** Leveraged large language models to produce dynamic, Bloom’s Taxonomy-aligned questions, fostering critical thinking and deeper student interaction.
- Text-to-SQL Interface:** Designed and implemented a robust agent that translates teacher queries into SQL, enabling rapid data retrieval and real-time performance analytics.

Graduate Engineer Trainee

Radius Synergies

Apr 2024 – Jun 2024

Delhi, India

- Predictive Analytics & ETL:** Built an ETL pipeline processing 17M+ records to prepare data for an electricity-consumption forecasting model, supporting strategic energy-efficiency planning.

CORE COMPETENCIES

Agentic AI & Multi-Agent Systems • Machine Learning & Deep Learning • Generative AI & LLMs • Model Context Protocol (MCP) • Retrieval-Augmented Generation (RAG) • Natural Language Processing (NLP) • Voice & Conversational AI • MLOps & Model Deployment

TECHNICAL SKILLS

Languages: Python (Advanced), TypeScript, SQL, C++

AI/ML & Agentic Systems: PyTorch, TensorFlow, Transformers, LangChain, ReAct Tool-Calling, Multi-Agent Orchestration, Scikit-learn

LLMs, RAG & MCP: Claude, GPT, Ollama, Together AI, Model Context Protocol (MCP), ChromaDB, FAISS, Sentence Transformers

Backend, Data & Voice: FastAPI, SQLAlchemy, Celery, Redis, WebSockets, PostgreSQL, Supabase, Whisper, ElevenLabs, Twilio, Pandas, NumPy

Cloud, Tools & DSA: Docker, AWS (EC2, S3, SageMaker), Git/GitHub, CI/CD, Weights & Biases, DSA (Arrays, Trees, Graphs, DP), LeetCode (200+ problems); light frontend: React, Tailwind CSS

EDUCATION

PSIT College of Engineering

B.Tech in Computer Science and Engineering

CGPA: 7.4

Kanpur, India

Bal Bharti School

12th – PCM

CGPA: 7.2

Prayagraj, India
